Dear Durand Parents and Guardians,

May 5, 2017

Our school system is committed to protecting student, teacher, and staff health. To protect our community and be in compliance with the Department of Education regulations, Durand Academy tested our schools' drinking water for lead.

Results of our Testing

Following instructions given in technical guidance developed by the New Jersey Department of Environmental Protection, we completed a plumbing profile for Durand. Through this effort, we identified and tested all drinking water and food preparation outlets. Of the samples taken tested below the lead action level established by the US Environmental Protection Agency for lead in drinking water (15 µg/l [ppb]).

For More Information

A copy of the test results is available in our office for inspection by the public, including students, teachers, other school personnel, and parents, and can be viewed between the hours of 8:30 a.m. and 4:00 p.m. and are also available on our website at www.durandac.org. For more information about water quality in our schools, contact Jennifer Amoroso at j.amoroso@durandac.org or 856-845-0777 ext. 117.

For more information on reducing lead exposure around your home and the health effects of lead, visit EPA's Web site at www.epa.gov/lead, call the National Lead Information Center at 800-424-LEAD, or contact your health care provider.

Sincerely,

Jennifer Amoroso, M.Ed., BCBA
Durand Principal
